

WINPOWER has set the standard for quality in the industrial and agricultural world since 1925. Our latest **POWER-PAK** design is perfect for compact installations in spray rigs and tool sheds. Winpower is a strong generator manufacturer with a national service network.

ENGINES

WINPOWER uses diesel engines known for superior performance. **Iveco** engines (Power Case IH and New Holland equipment) and **Isuzu** have service networks readily available domestically and internationally. These engines run at 1800RPM and come with a commercial warranty.

ALTERNATORS

Twelve lead reconnectable generators operating at an industry **BEST** 105 heat rise for prime power are utilized in most models. Lower generator temperatures increase efficiency, reduce wear, and result in the best return on your generator investment.

ENGINEERING:

WINPOWER **POWER-PAK** units have paired industry best engines with world class generator ends and have created a product that is second to none. These units come standard with Deep Sea 702 controllers (pictured above). These controllers are equipped with an hour meter as well as low oil, over temperature, and over speed safety shutdowns. Frames are built with size in mind to fit these units in tight spaces. Optional sub-base fuel tanks are available.

MODEL	DE45I4
STANDBY RATING	45kW @ 105 ⁰
PRIME POWER RATING	40kW @ 105 ⁰
DIMENSIONS	
L x W x H	70" x 29" x 51"
ENGINE DATA	
MAKE	IVECO
MODEL	N45 SM1
GROSS HP	65
CYLINDERS	4
EPA	TIER III
ALTERNATOR DATA	
TYPE	4 POLE REVOLVING FIELD
SPEED	1800 RPM
INSULATION	CLASS H
THD	<5%
VOLTAGE REGULATION	1.50%
FUEL CONSUMPTION	
100% LOAD	4.09 GAL/HR
50% LOAD	2.16 GAL/HR
WARRANTY	
ENGINE	1 YR/UNLIMITED HRS
UNIT	1 YR/1000 HRS
